Yathharthh Garg

+91 9509285847 | yathharthhgarg@gmail.com

BSc. Mathematics & Actuarial Science graduate with a keen interest and experience in the field of data analysis. Eager to deploy my skill set and learn more within a working environment of professionals.

Academic Qualification

Program	Institution	CGPA	Completion
BSc. (Mathematics & Actuarial Science)	Leicester University	7.0	2023
XII	DPS Jaipur	8.4	2019
X	DPS Jaipur	9.2	2017

Technical Skills
- Python
- My SQL
- Power BI
- MS Office Suite
- Tableau

Academic Projects

- **Portfolio Website** : All of my below mentioned projects can be found on my portfolio website: https://yathharthhgarg.github.io/

- **E-Commerce Dashboard (Power BI)** : Our objective involved developing a dashboard presenting diverse sales metrics sourced from a selected data set. Working collaboratively as a team of two, we integrated filters into the dashboard, enabling users to access information based on their preferred quarter or state.

- **King County House Sales (Tableau)** : The objective was to design a dashboard featuring various metrics of house prices in King County, Washington, USA, using a provided data set. I implemented filters tailored to assist real estate agents in the region and developed a map displaying average house prices.

- **Movies Correlation (Python)** : In this project, we were provided with a data set containing various attributes pertaining to movies sourced from IMDB. Our objective encompassed data cleansing procedures and the identification of the variable demonstrating the strongest correlation with movie net profit.

- **Car Analysis (MYSQL)** : A project where I analyzed different queries from a data set of my own choosing. The project familiarized me with different data extraction techniques used in MYSQL such as how many cars of a particular type were available in a given year and so on.
